Special Topics in Psychiatry - The Special Topics in Psychiatry is an elective course focusing on mental health disorders and dispelling the myths and stigma associated with mental health disorders. Topics that are currently not presented in required curriculum (e.g. Therapeutics) are highlighted.
AMCP P&T - The AMCP Student Pharmacist P&T competition is intended to give students an opportunity to hone a variety of skills including critical analysis, presentation and research skills while gaining a real world perspective of the formulary management process. Students will evaluate the available scientific, clinical and economic evidence for a new molecular entity, conduct a cost/benefit analysis, assess the impact on patient population outcomes and relate drug therapy choices to practice guidelines.
