UNIVERSITY OF CALIFORNIA, SAN DIEGO  
Skaggs School of Pharmacy and Pharmaceutical Sciences  
2016 Entrance Health Requirements

Each new student is required to submit a completed Immunization Form. In addition, a tuberculosis skin test is required within three months prior to enrollment (the earliest acceptable date is July). If entering students know from past experience that they have a positive tuberculin skin test, the report of a recent (within 12 months) chest X-ray and a physician exam (TB screening) stating the student is symptom free (within 3 months of entering school) must be submitted. Students must also provide evidence of immunity from measles (Rubeola), mumps, rubella (German measles) and varicella (chicken pox). This evidence may take the form of documentation of immunization or laboratory confirmation of immunity. Students must have received at least 1 dose of Tdap and at least 2 of 3 doses of hepatitis B vaccine prior to registration. The third dose in the hepatitis B series must be received prior to registration for the Winter quarter.

Student Health Services (SHS) will provide a brief presentation during orientation. In the meantime, here is the link to the UC San Diego SHS: http://studenthealth.ucsd.edu/.

We also require that all new entering student pharmacists be CPR Certified. The training may be done anywhere but must be certified through the American Red Cross or the American Heart Association. The type of certification can be CPR/AED Adult, CPR AED Adult plus Child/Infant or American Heart Association BLS for Health Care Provider course. You will need to show us proof of your certification at orientation. Please photocopy your card and bring to Orientation.
