## **I. Course Description: SPPS 402 (8 units)**

SPPS 402 is a six week core APPE supervised by licensed pharmacist(s) in a community pharmacy setting. Through direct supervision and some independent practice, students will engage, develop and explore roles in a community pharmacy practice. Students provide patient education, prescription and over-the-counter (OTC) recommendations, customer service, and interact with pharmacists, pharmacy staff, health care professionals, and other medical staff. Students will also process, bill, prepare, and dispense medications while becoming familiar with management related issues such as medication acquisition, disposal, pharmacy metrics, training, administration of vaccines, and supervision of pharmacy staff. Students will have the opportunity to provide patient oriented drug therapy education, recommendations, disease and medication adherence monitoring to a diverse patient population, with an emphasis on effective communication with patients and other members of the health care team.

Through this supervised experience, students will be able to apply concepts from clinical didactic course work, simulations, and Introductory Pharmacy Practice Experiences (IPPEs) to effectively address a wide range of situations encountered in community settings. Students will also appropriately utilize the Pharmacist Patient Care Process (PPCP) and online drug information resources. Depending on the pharmacy and preceptor's consent, the student may consult and discuss drug therapy with patients, pharmacists, physicians and other health care providers.

Pharmacy settings may include independent, chain, grocery, and institutional community sites. This opportunity will provide students with advanced expertise in accessing, evaluating, and applying information to promote optimal patient care to a diverse population, while enhancing their pharmacy practice and managerial skills to become effective pharmacists in this setting.

Students should refer to the OEE section on the Resources tab of Canvas and Core ELMS for specific Rotation Descriptions and additional resources.

Students are expected to adhere to all [Policies and Guidelines](#) at SSPPS.

## **II. Prerequisites**

### **Students must:**

1. Have successfully completed didactic pharmacy years 1-3.
2. Have successfully completed all IPPE requirements.
3. Meet eligibility requirements to progress to APPEs per SSPPS Progression Policy.
4. Meet expectations of professionalism as stated in the SSPPS Guidelines on the Evaluation of Professionalism.
5. Have received a passing score on the Comprehensive Cumulative exam.
6. Have a valid and active pharmacy intern license.
7. Have up-to-date immunization records and received HIPAA training.
8. Have requisite training/certifications necessary for the given activity as well as all required components set by the practice site.

### III. Course Goals

Students will interact with patients, pharmacy staff and other healthcare providers while participating in a variety of learning activities which will further develop and enhance professional judgment, knowledge, and the skills needed to practice in the community pharmacy setting. Under the preceptorship of the pharmacist, the student will be provided with many opportunities to apply academic basic science and clinical didactic course work to patient care in the community setting. Students will demonstrate ethical and professional behavior in all practice activities.

### IV. Course Objectives, Activities, and Link to PPCP<sup>1</sup>

Objectives	Example Learning Activities	PPCP
1. Demonstrate ethical and professional behavior in all practice areas.	<ul style="list-style-type: none"><li>• Demonstrate ethical and professional behavior in all practice activities.</li><li>• Adhere to patient privacy standards and ethical principles, in verbal and written communications.</li><li>• Demonstrate an attitude that is respectful of diverse individuals, groups, cultures, and communities.</li><li>• Demonstrate appropriate attire, demeanor, and conduct.</li><li>• Adhere to attendance requirements, including punctuality.</li></ul>	n/a
2. Demonstrate appropriate depth and breadth of pharmacotherapeutics and disease-related knowledge for a variety of common conditions seen in patients in the community setting.	<ul style="list-style-type: none"><li>• Participate in and/or lead topic discussions.</li><li>• Apply the PPCP to every patient assigned by the preceptor, essentially independently, and present to the preceptor.</li><li>• For those medical problems and drugs which were not covered in the didactic curriculum, be able to efficiently locate appropriate literature resources.</li></ul>	n/a
3. Collect information necessary to identify and diagnose a patient's medication-related problems and health-related needs. (EPA 1)	<ul style="list-style-type: none"><li>• Collect a history from a patient or caregiver.</li><li>• Collect a medication history from a patient or caregiver.</li><li>• Collect a patient's experience with medication.</li></ul>	Collect

	<ul style="list-style-type: none"> <li>• Collect information related to barriers for patients to take their medication(s).</li> <li>• Collect objective information from the patient (e.g., physical exam, point of care testing).</li> <li>• Collect data from a patient's electronic health, digital health, or medication record.</li> </ul>	
4. Assess collected information to determine a patient's medication-related problems and health-related needs. (EPA 2)	<ul style="list-style-type: none"> <li>• Assess the indication of the medication treatment plan.</li> <li>• Assess the safety of the medication treatment plan including drug interactions.</li> <li>• Assess the effectiveness of medication treatment plans, including existing, previous, and new medications.</li> <li>• Assess the alignment of the medication plan with the patient's goals, needs, abilities, values, and beliefs.</li> <li>• Assess the relative priority of each health-related need of the patient to create a prioritized problem list.</li> <li>• Assess if a patient requires a referral for their health-related needs.</li> <li>• Assess whether a patient is eligible for CDC-recommended immunizations.</li> </ul>	Assess
5. Create a care plan in collaboration with the patient, others trusted by the patient, and other health care professionals to optimize pharmacologic and nonpharmacologic treatment. (EPA 3)	<ul style="list-style-type: none"> <li>• Create person-centered treatment goals.</li> <li>• Create a prioritized list of evidence-based and patient-centered treatment options to discuss with members of the health care team/patient/caregivers(s).</li> <li>• Create a person-centered treatment plan.</li> <li>• Create a plan to mitigate the risk of drug interactions and polypharmacy.</li> <li>• Create a treatment plan that incorporates potential strategies to minimize cost for the patient, such as formulary review,</li> </ul>	Plan

	<p>patient assistance programs, medication discount programs.</p> <ul style="list-style-type: none"> <li>• Create a plan and monitor the safety and efficacy of the treatment plan.</li> <li>• Create an individualized education plan for the patient and/or caregiver.</li> <li>• Conduct formal MTM process including comprehensive medication reviews and targeted interventions.</li> </ul>	
<p>6. Answer medication related questions using scientific literature. (EPA 5)</p>	<ul style="list-style-type: none"> <li>• Ask clarifying questions to identify and address the true question.</li> <li>• Perform a systematic search of tertiary, secondary, and primary resources.</li> <li>• Identify and retrieve high-quality scientific literature.</li> <li>• Analyze scientific literature.</li> <li>• Provide a written or verbal response to the true question, including findings and recommendations.</li> </ul>	<p>Plan</p>
<p>7. Fulfill a medication order. (EPA 7)</p>	<ul style="list-style-type: none"> <li>• Enter an order or prescription into an electronic health or pharmacy record system.</li> <li>• Perform calculations required to compound, dispense, and administer medications.</li> <li>• Perform a prospective drug utilization review.</li> <li>• Adjudicate a third-party claim.</li> <li>• Identify and manage drug therapy problems.</li> <li>• Consider formulary preferred medications when making recommendations.</li> <li>• Complete an authorization process for a non-preferred medication.</li> <li>• Assist a patient to acquire medication(s) through support programs.</li> <li>• Prepare non-sterile and/or sterile medications.</li> </ul>	<p>Implement</p>

	<ul style="list-style-type: none"> <li>• Perform a quality assurance check on prepared medications prior to dispensing.</li> <li>• Dispense and administer a product including injectable medications and immunizations.</li> <li>• Adhere to state and federal laws/regulations and site quality and safety procedures.</li> </ul>	
8. Educate the patient and others trusted by the patient regarding the appropriate use of a medication, device to administer a medication, or self-monitoring test. (EPA 8)	<ul style="list-style-type: none"> <li>• Provide education and self-management training to the patient or caregiver.</li> <li>• Assess the learning needs of a patient and others trusted by the patient.</li> <li>• Select a method for providing education in the given environment.</li> <li>• Actively engage the patient in the education session.</li> <li>• Identify, select, or develop supportive education materials (e.g., written, models, demonstration devices, videos).</li> <li>• Adapt the terminology and verbal delivery of information.</li> <li>• Determine the effectiveness of education provided by assessing a patient's understanding and/or their ability to demonstrate the technique.</li> <li>• Reinforce key points, correct misunderstandings, or address gaps with the patient as needed.</li> </ul>	Implement
9. Report adverse drug events and/or medication errors in accordance with site specific procedures. (EPA 10)	<ul style="list-style-type: none"> <li>• Identify factors of system(s) (e.g., personnel, infrastructure, interfaces) associated with errors or risk of errors.</li> <li>• Determine points of intervention within system(s) to prevent or minimize medication-related errors.</li> <li>• Report and document adverse drug events and medication errors to stakeholders.</li> </ul>	Follow up: Monitor and evaluate
10. Identify populations at risk for prevalent diseases	<ul style="list-style-type: none"> <li>• Perform a screening assessment to identify patients at risk for prevalent</li> </ul>	n/a

<p>and preventable adverse medication outcomes. (EPA 12)</p>	<p>diseases in a population and triage, when needed.</p> <ul style="list-style-type: none"> <li>• Evaluate individual and/or aggregated patient data to determine patients or populations at risk for a disease.</li> </ul>	
<p>11. Perform the technical, administrative, and supporting operations of a pharmacy practice site. (EPA 13)</p>	<ul style="list-style-type: none"> <li>• Fulfill medication orders appropriate to community practice including prescription verification, telephone orders, proper selection, preparation, compounding, labeling, storage, packaging, handling and disposal.</li> <li>• Identify and resolve drug-drug, drug-disease, and drug-nutrient/food interactions.</li> <li>• Utilize Controlled Substance Utilization, Review and Evaluation System (CURES), or equivalent prescription drug monitoring program (PDMP) to ensure appropriate dispensing of controlled substances.</li> <li>• Execute pharmacy policies and procedures.</li> <li>• Delegate work activities to pharmacy team members.</li> <li>• Provide formative feedback on pharmacy team dynamics, workflow, processes, and operations.</li> <li>• Manage pharmacy workflow to ensure efficiency and safety.</li> <li>• Use technology to support the pharmacy workflow.</li> <li>• Execute pharmacy quality improvement activities.</li> <li>• Procure inventory to ensure continued pharmacy operations.</li> <li>• Prepare for regulatory visits and inspections.</li> </ul>	n/a

<sup>1</sup> Course Goals, Objectives, and Activities Adapted from:

- *Essential Elements for Core Required Advanced Pharmacy Practice Experiences. Am J Pharm Educ. 2019 May;83(4):6865.*
- The AACP Academic Affairs Committee's Guidance for Use of the Curricular Outcomes and Entrustable Professional Activities (COEPA) for Pharmacy Graduates. *Am J Pharm Educ. 2023;87:100562.*

**V. Evaluations:**

- A. Grading will be Pass/Fail.
- B. Three evaluations using the standardized Pharmacy Evaluation Form are required for this course:
  - I. Mid-point Formative Evaluation: An online self-evaluation completed by the student and discussed with the preceptor. The preceptor will provide written and verbal comments and sign off.
  - II. Preceptor & Site Evaluation: Separate online evaluations completed by the student at the end of the rotation.
  - III. Summative Evaluation: An online evaluation completed by the preceptor at the end of the rotation and discussed with the student.

Students may be evaluated at any other time at the discretion of the preceptor. Preceptors may evaluate students more frequently, so that the student is informed of areas requiring improvement early in the rotation. The primary preceptor may obtain feedback from all team members as well as any patient comments.

Students **must** submit a completed Mid-point Formative evaluation in addition to evaluations of their sites/preceptors in order to receive a grade for the experience.

**VI. SSPPS Rotation Equity, Diversity and Inclusion Statement**

Each rotation is a place to expand knowledge and experiences safely, while being respected and valued. We support the values of UC San Diego to “create a diverse, equitable, and inclusive campus in which students, faculty, and staff can thrive.” It is our intent that students from all diverse backgrounds and perspectives be well served by this rotation, that students' learning needs be addressed, and that the diversity that students bring to this rotation be viewed as a resource, strength and benefit. It is our intent to present materials and activities that are respectful of diversity: gender, sexuality, disability, age, socioeconomic status, ethnicity, race, religion, and culture. We ask that everyone engage in interactions with patients, caregivers and other members of the healthcare team with similar respect and courtesy. All people have the right to be addressed and referred to in accordance with their personal identity. We encourage everyone to share the name that they prefer to be called and, if they choose, to identify pronouns with which they would like to be addressed. We will do our best to address and refer to all students accordingly and support colleagues in doing so as well. We hope you will join us in creating a learning experience that upholds these values to further enhance our learning as a community.

## VII. Use of Generative Artificial Intelligence (AI)

The use of generative AI tools in clinical or experiential settings is strictly regulated, and misuse can lead to serious consequences, including but not limited to violations of the Health Insurance Portability and Accountability Act (HIPAA) and causing harm to patients. Generative AI is to be used as an assistive tool and should never be used as a substitute for clinical or professional judgment.

SSPPS students are responsible for staying informed about and adhering to the guidelines for using approved generative AI tools at their practice sites. Students are advised to ask preceptors and/or site coordinators about each site's generative AI use policy during orientation to the practice site. In the absence of a generative AI use policy at the practice site, the use of such tools should be assumed to be prohibited.

## VIII. Resources

- A. SSPPS References: [Students & Preceptors](#)
- B. [UCSD Intranet \("Pulse"\) Medication Resources](#)
- C. [Online Clinical Library Resources](#)
  - i. Clinical Pharmacology
  - ii. Micromedex
  - iii. DynaMed
  - iv. Up to Date
  - v. Natural Medicines Database
- D. Suggested Textbooks (updated versions may be available)
  - i. Medical dictionary (ex: Stedman's Medical Dictionary, Dorland's Medical Dictionary).

- H. As specified by rotation site/preceptor.

## **Appendix 1**

Topics for discussion may include:

- A. Operations:
  - a. Pharmacy layout
  - b. Security
  - c. Prescription processing
  - d. Dispensing
  - e. Billing and reimbursement
  - f. Insurance
  - g. Compounding
  - h. Specialty medications
  - i. Transferring prescription orders
- B. Education and Clinical Interventions:
  - a. Counseling (Rx, OTC, complementary, herbals)
  - b. Medication therapy management (MTM)
  - c. Health education
  - d. Screening
  - e. Referrals
  - f. Immunizations
- C. Legal and Quality Issues:
  - 1. HIPAA
  - 2. Application of pharmacy law
  - 3. Controlled substances
  - 4. Risk Evaluation and Mitigation Strategy
  - 5. Liability issues
  - 6. Clinical practice dilemmas
- D. Management:
  - 1. Supervision
  - 2. Scheduling
  - 3. Personnel issues – including human resource conflicts
  - 4. Organizational structure
  - 5. Productivity measures
  - 6. Marketing
  - 7. Creating a business plan
  - 8. Budget and financial projections

## Appendix 2

Prepare formal verbal and written presentations on topics related to community pharmacy practice as assigned by preceptor

1. The goals of this discussion are:
  - a. To provide practical information for clinicians, staff or patients
  - b. To give the student the opportunity to organize and relate drug information to a specific audience
  - c. To provide verbal and/or written feedback to the student
2. Assignments may include (but not limited to):
  - a. New drug evaluations
  - b. Discussion of current guidelines
  - c. Patient educational materials
  - d. Department newsletters
  - e. Patient case presentation\*

**\*If the topic includes a patient case presentation, the student should include the following elements:**

- a. Reason for clinic visit and chief complaint
- b. History of present illness
- c. Past medical history
- d. Medication history (Rx, OTC, allergies/ADRs, adherence)
- e. Summary of pertinent review of systems and physical examination
- f. Pertinent labs
- g. Assessment of response and appropriateness of current therapy
  - i. Evaluation of the rationale for its use
  - ii. Comparison of alternative therapies and therapeutic approaches which may be beneficial for the problem in question (this will include a comparison of efficacy, adverse reactions, toxicity and relative advantages and disadvantages of each therapy).
  - iii. Discussion of recent developments and/or controversies on the topic or drug presented and a critical evaluation of literature reviewed.
  - iv.
- h. Therapeutic plan
- i. Therapeutic considerations
  - i. Discussion of pertinent pharmaceutical considerations (dosage form, stability, cost, insurance coverage, ease of use by the patient, dexterity issues, etc)
- j. Monitoring parameters
- k. Planned follow-up

### Appendix 3: Pharmacists' Patient Care Process (PPCP) Template

Patient Name:	Age:	Race/Ethnicity:	Gender/Pronouns:	Wt:
<b>COLLECT: What data is relevant to assess the primary problem?</b>				
Subjective	<b>CC (Chief Concern/Complaint):</b> reason for the visit or admission <b>HPI (Symptoms, Characteristics, History, Onset, Location, Aggravating factors, Remitting factors):</b> <b>Meds (Rx, OTC, herbal/supplements):</b> dose, route, frequency ± duration, indication, efficacy, ADEs, adherence <b>Allergies and type of reaction:</b> <b>Relevant PMH/FH:</b> <b>Relevant SH:</b> diet, exercise, alcohol, tobacco, recreational drugs, occupation, etc.			
Objective	<b>Labs, vitals</b> (e.g., BP, HR, RR, temp, O <sub>2</sub> sat, pain score), <b>physical exam</b> (positive findings, Ht, Wt), <b>procedures/imaging</b>			
<b>ASSESS</b>				
Primary Problem				
Problem Status	<b>What needs to be done for the problem:</b> <input type="checkbox"/> <b>Needs treatment</b> (e.g., chronic condition is uncontrolled, acute problem requires drug therapy) <input type="checkbox"/> <b>Refer</b>			
Current Therapy	<ul style="list-style-type: none"> <li>▪ <b>Indicated?</b> Does the problem require drug therapy? Should current therapy be continued, changed or stopped? Why?</li> <li>▪ <b>Effective?</b> What is the anticipated effect of current therapy (e.g., average A1c reduction)? Is the dose optimized (too high/low, appropriate for age, comorbidities, renal/liver function, convenient to take/administer, etc.)</li> <li>▪ <b>Safe?</b> Any ADEs, DDIs or contraindications?</li> </ul>			
New Therapy	<b>What other meds could be considered? What is the anticipated effect of new therapy? Will it achieve goals?</b>			
New drug/class	PROS: Identify patient-specific pros of current therapy	CONS: Identify patient-specific cons of current therapy		
New drug/class				
<b>PLAN / IMPLEMENT / FOLLOW-UP</b>				
Treatment Goal(s)	Cure/reduce symptoms, correct lab/vitals, minimize/avoid ADE/DDI, prevent complications, reduce morbidity/mortality			
Recommended Drug Therapy	<ul style="list-style-type: none"> <li>▪ <b>Current therapy</b> (continue/increase/decrease/stop):</li> <li>▪ <b>New drug therapy</b> (start): Drug name(s), strength, dose, route, dosing frequency ± duration of therapy</li> </ul>			
Non-Drug Therapy/ Preventative Care	Patient-specific lifestyle modifications (e.g., specific targets for diet, exercise, tobacco, alcohol, actions to do/avoid...)			
Monitor/Follow-up	<b>Efficacy monitoring</b> <ul style="list-style-type: none"> <li>▪ What monitoring (S/O) parameters will indicate if therapy is working?</li> <li>▪ How often should parameters be checked?</li> <li>▪ Next steps if goal(s) not achieved</li> </ul>		<b>Toxicity/adverse effects monitoring</b> <ul style="list-style-type: none"> <li>▪ What monitoring (S/O) parameters will indicate if ADEs or toxicity is occurring?</li> <li>▪ How often should monitoring occur?</li> <li>▪ How would ADEs or toxicity be managed?</li> </ul>	
Patient Education (for selected plan) 3 Prime Questions Disease education	<ul style="list-style-type: none"> <li>▪ What the drug is for: indication/symptoms being treated, why the drug is needed/preferred for this patient</li> <li>▪ How to take it: medication name(s), dose, frequency, duration, administration, how to optimize adherence</li> <li>▪ <b>What to expect:</b> onset, common side effects and how to manage, potential drug interactions, missed doses, storage</li> <li>▪ Lifestyle changes/non-drug therapy</li> </ul>			
± Coordinate Care ± Documentation	<ul style="list-style-type: none"> <li>▪ What needs to be done for follow-up (e.g., clinic/telehealth visit, phone call, labs, home monitoring), when, and with who</li> <li>▪ ± Considerations for addressing medication access, SDOH (e.g., where/how to get med, cost, adherence barriers)</li> <li>▪ ± Communicate plan to other providers (e.g., document in health record, phone call, provide written summary to patient)</li> </ul>
